

Voluntary Assisted Dying Survey 2020

As a member of a voluntary euthanasia or assisted dying organisation, you are ideally positioned to help us better understand people's end-of-life choices.

The survey is designed to capture a wide range of perspectives on many issues about death and dying, which some people may find confronting.

Survey participation is voluntary.

You are welcome to provide as little or as much information as you wish and to exit the survey at any time.

On average it will take about 10 minutes to complete.

All data will be aggregated to find patterns and trends across a diverse range of participants. Your individual responses will never be analysed nor reported separately.

We thank you in advance for your participation should you wish to continue. Your points of view are greatly valued.
